- **Version Control & tools/other:** Git, Chrome Developer Tools, Bash Shell, Heroku Deployment

EDUCATION

Rutgers University, New Brunswick, NJ

Full Stack JavaScript Development

May 2017 - August 2017

An intensive 12-week, full time coding program dedicated to designing and building web applications. Skills learned consisted of HTML5, CSS3, Javascript(es6), React Js JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handlebars JS, MERN Stack, Git, Command Line

B.A. Information Technology & Informatics (3.625 GPA), B.A. Economics (3.333 GPA) 2013-May 2017

Rel. Coursework: Object Oriented Programming(Java) | Advanced Web Design Technologies | Database Technologies(MySQL) | Intro to Computer Science(Java) | Web Design | Fundamentals of Data Science (R) | Human Computer Interaction(UX) | Informatics & Design (UX) | Management of Technological Organizations

Rel. Coursework: Econometrics | Financial Economics | Economics of Capital Markets | Market Discipline | Int. Micro Analysis | Int. Macro Analysis

RELEVANT EXPERIENCE

Bank of Tokyo-Mitsubishi UFG

Summer 2016

Data Warehouse Application Governance Intern

- Requirements gathering for department website
- Created website for Information Management Department (using JIVE)
- Created heat maps based off of schemas and documentation for platforms used- BO, OBIEE, N-tier

APPLICATIONS BUILT

Watchlist [Heroku](#) | [Github](#)

- Personalize movies and tv shows they are previously watched, are watching and will watch in the future
- **Technologies:** Node js, Express js, MySQL, Sequelize ORM, Omdb npm, JQuery, Bootstrap HTML5, CSS3
- **Role:** Full Stack Developer

NetDev.me [Github](#)

- Networking site targeted towards developers and employers.(like LinkedIn). Users can create an account edit their portfolio based on skills, view tech news on their homepage, and connect with other developers.
- **Technologies:** React JS, MongoDB, Mongoose ODM, Node js, Express js, Materialize JS
- **Role:** Back End & React developer

New York Times React [Github](#)

- User is able to search for NYT Articles based on a keyword, start date, and end date. Results are then rendered on the page and the user can choose to save articles to the database.
- **Technologies:** React js, MongoDB, Mongoose ODM, Node js, Express Js, Bootstrap, Axios npm,
- **Role:** Full Stack Developer

Active-Search [Site](#) | [Github](#)

- Allows users to search for outdoor activities based on radius, zip code and/or location. Activities based on the users locations search will populate the page. Activities locations plotted on Google Maps
- **Technologies:** Google Maps API, Weather API, Active Network API
- **Role:** Front End Developer(Google Maps & API's)

ACHIEVEMENTS

Fall 2017 HackRU - RBC Capital Markets 5th Place Winner

- Facial recognition application that connects users to their social media accounts
- Role: Server Side/Front End Developer (Html, CSS, Bootstrap, JQuery, Node/Express js)

ACTIVITIES

RU Breaks (B-boy Student Organization of Rutgers)

Co-President '16 - '17 | President '15 - '16 | Treasurer '14 - '15 | Member '13 - '14

2013-2017

- Worked as a team to organize multiple, breakdance competitions with over 300 attendees from the tri-state area (on campus, various locations) and generated club profit
- Contracted with professional break dancers in the tri-state area
- Introduced Rutgers students into breakdancing during practice sessions and workshops
